Rui Xu Mar 23 2023:

The 1st page is the landing page

The 2nd page is designed for these 2 requirements:

R1: Search for an event by topic/keyword/venue

R2: Explore the search results

The 3rd page is designed for these 3 requirements:

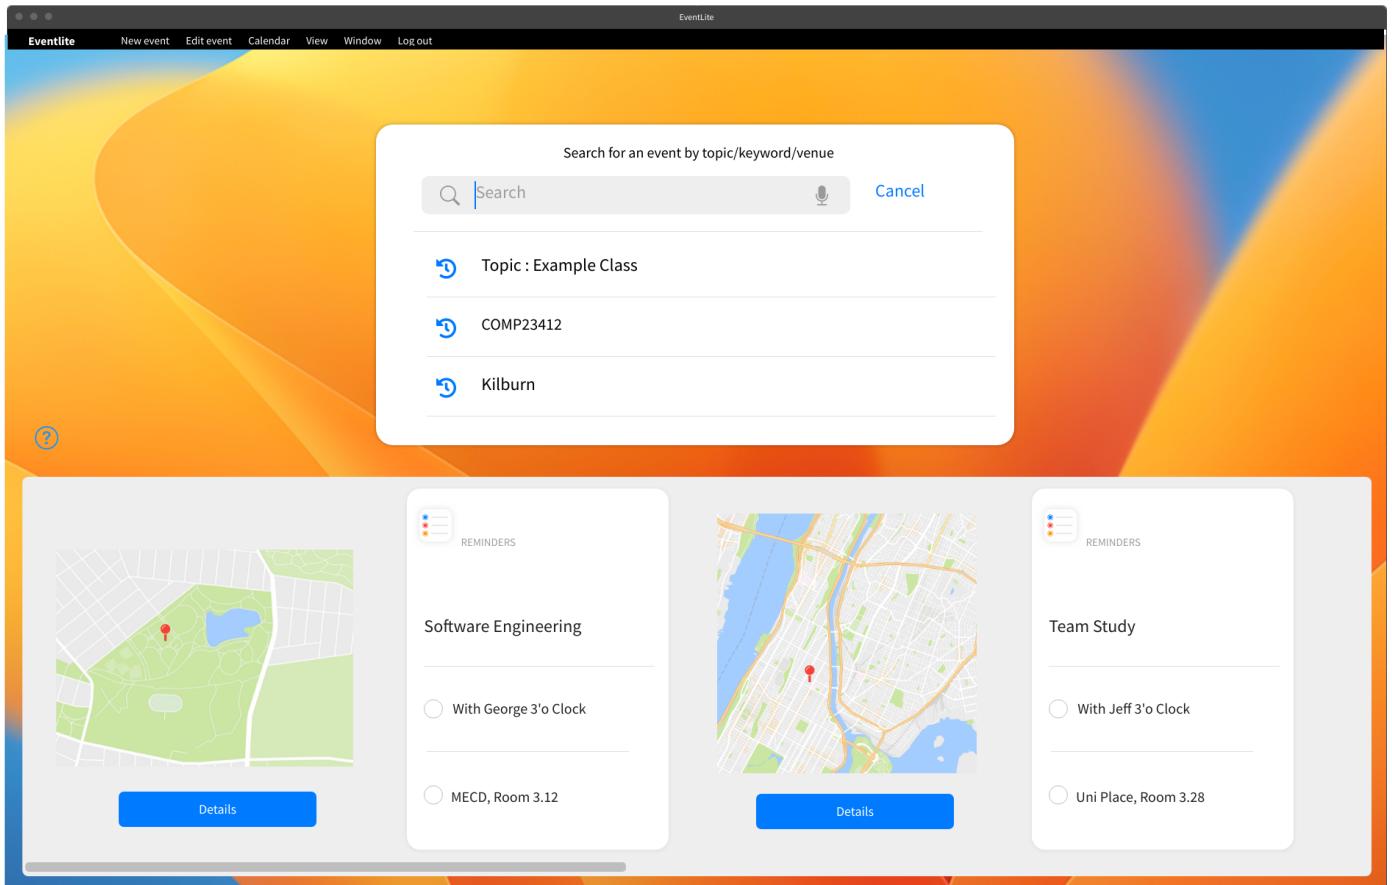

R3: See a list of events for a venue, organised by date

R4: Locate an event on a map

R5: See a calendar of upcoming events

All images/components are from Apple Developers Community

The screenshot displays the EventLite application interface, which integrates a calendar, a map, and a location search feature.

Top Bar: The top navigation bar includes links for "Eventlite", "New event", "Edit event", "Calendar", "View", "Window", and "Log out".

User Profile: A profile section for "Rui Xu" from "University of Manchester" is shown, along with a search icon and a sorting dropdown set to "Sorted By Date".

Event Calendar: The main calendar area shows two days of events:

- Monday 16:** Technical Meeting 2023 (10:00 AM - 11:30 AM) and LV Fashion Show (12:00 AM - 02:30 AM).
- Monday 23:** Presentation (10:00 AM - 11:30 AM) and Meet Solomon (12:00 AM - 02:30 AM).

Map View: A large map of a city area with several red location markers. A red arrow points from the event "Technical Meeting 2023" on Monday 16 to one of these markers on the map.

Locate an event on a map: A sidebar feature allows users to search for events on a map. It includes a placeholder "Locate an event on a map", a user profile picture, and a green location marker on the map. Below this is a search form with fields for "Event Name", "Organizer", and "Time (AM/PM)" with a date picker showing "September 17 2014". Buttons for "Locate This Event" and "Set Up Later" are present.

Upcoming Events: A list of upcoming events for Monday:

- Coffee with Sam
- Weekly progress

Calendar: A monthly calendar for March 2023 shows specific dates highlighted with red dots, indicating scheduled events. The calendar includes navigation arrows for "Today", "Calendars", and "Inbox".
